Chairman's Message

The evolution of the Indian Federation of Spiritual Scientists indicates the will of the spiritual scientists of the world to come together on a common platform with the mission to help global transformation.

Under the aegis of the IFSS, many workshops have been conducted and thus thousands of dedicated spiritual seekers stand benefited over the last three years since its inception.

The magazine "Spiritual Science" an organ of the IFSS has been very well received in all quarters where spiritual wisdom has been the subject of learning.

The launching of this Newsletter by the IFSS is yet another milestone that needs to be commended since it opens up the potential for one more channel of communication with the outside world particularly with spiritual scientists.

In the words of Torkom Saraydarian, "The future of humanity does not depend on medicine or in physics but upon meditation".

The goal of IFSS is only to provide spiritual enlightenment to each individual by providing; introducing on theory and the practice of meditation and vegetarianism. 'Atma Vignan' the newsletter of the IFSS will have a major role in this direction.

Brahmarshi Patriji
Chairman IFSS

“ The “ **Small i** ” represents the individual who identifies with his personality “ **Body - Mind** ” .. and the “ **big I** ” represents the individual who identifies himself / herself with his / her “ **Eternal Soul** ”. The “ **Small i** ” and the “ **big I** ” .. in togetherness .. represent harmonizing of the personal Body - Mind identity with the **Eternal Soul identity** ”
